

Freedom of Information Request FOI 24 67

The number of callouts from Jan 23

Query and Response:

The number of callouts each month since January 2023 across the whole area

Alongside this, can you state how many of these each month were false call outs, and where they were (e.g. shops, houses)

Could you tell me which 5 locations have the highest number of false callouts in the DW fire and rescue area, and how many they've each had?

Could you also tell me the highest three causes of fire for the DW fire area for the past year, and how many incidents have been attended for each cause?

Information/Detail accurate on the date provided: 19, June 2024
